

OD 3500 and Binding Modules

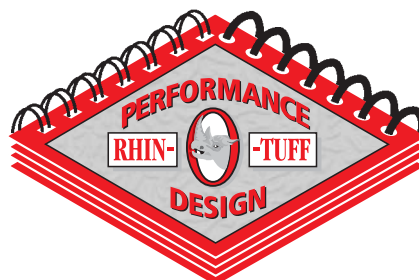

See back of sheet for pictures of modules mounted in combination.

Mandrel set comes with Coil Inserter.

COMBO BINDING STATION

- ❑ The OD 3500 Combo Binding Station will accept three different binding modules to make a stand-alone binding machine.
- ❑ Each binding module may be mounted individually or in combination.
- ❑ Incorporating the OD 3500 into your bindery stream will allow you to take binding modules off of a OD 4000 combo punch and bind configuration and put them on the OD 3500. You can then use the OD 4000 punch for punching only and the OD 3500 for binding. This can effectively double production throughput of a OD 4000 punch and bind system.
- ❑ Any one of the three binding modules may be purchased and easily installed on the OD 3500 Combo Binding Station in less than 5 minutes.
- ❑ The Combo Binding Station and modules are an exclusive feature from Performance Design and are "Rhin-O-Tuff".
